

## **St Mark's Support Staff Comment about Bulge Class Expansion – April 2016**

As support staff, a large part of our job involves working with either individual or small groups of children.

Over their school life, many children will experience the need for additional support, be it for over a short or longer period of time.

We have many fantastic intervention schemes which, in order to be delivered effectively, require a quiet, private area.

At present there are only a few designated rooms for this purpose. With the proposed expansion, much more space will be available for us to carry out this vital work which supports the needs of our children so effectively.

We too are also committed to providing the best education for our children during the construction period.
